

Description of data Time from arrival to start of definitive treatmen from a decision-making clinician (someone who can define the management pla and discharge the patient).

Key messages

Time to the start of treatment should be minimised but not at the expense of other A&E Clinical Quality Indicators. Expert clinical opinion suggests that patients should be seen by a decision-maker within 60 minutes of arrival, but this may be too long for the more serious cases. The earlier the correct management plan is made the better for the patient; a wait of over 30 minutes is excessive for certain

presentations, e.g., sepsis, stroke, myocardial infarction, respiratory distress. A median above 60 minutes from arrival to seeing a decision-making clinician across all patients may trigger intervention as this is one of the five A&E quality indicators included as a headline measure under national oversight to assess organisational and system health in the NHS Operating Framework for 2011/12.

Site performance against national benchmarks and performance thresholds)

Description of Performance

Narrative Following triage any patient requiring urgent attention would be prioritised and seen by an appropriate clinician. The time to be seen by a decision making clinician for patients who do not require immediate or urgent attention. Wait times can be affected by the number of urgent cases, complexity of other cases in the department at the time, peaks in activity, depletion of medical staffing as they cross cover for the wards/ theatre. We continue to triage appropriately and expedite urgent cases that require immediate attention. There has been a change over of Doctors for this monitoring period and they often require to discuss plans of care with a senior which has the impact on the time to treatment times Following a review of staffing from a workforce review we have employed 3 staff in development post to become Emergency Nurse practitioners. Part of this is to have patients seen by a nurse if appropriate, once the competencies are achieved this will enhance the number of clinical decision makers within the department and should reduce the median wait time. This however will take a period of months training to be undertaken. The implementation of Consultant nurse sessions in the department has not been achieved due to other organisational pressures. There is also a decrease in the clinical sessions provided by the assigned consultant again due to pressures in other departments. We are proactively as a team continually looking at ways to improve the patients flow through the department and ensure the time they are in GED is kept to a minimum. After last months achievement this is a disappointment but there are many factors that affect this .

76 Median this month 60 Target Data quality

Service experience

What have we done to understand and assess the experience of our patients from April 2015- October 2015

Nursing quality indicators are now embedded and monthly patient questionnaires are undertaken. . Display boards are now in place in the department to share feedback.

These results will be monitored and reported to the Trust Plans-

Action Plans will be generated by the department Manager and the GED team to address any deficits.

Friends and Family questions are being asked and results are now available and published for GED .We are actively promoting feedback

. Social media, twitter is also being used to encourage our patients to give feedback about the our Services. A text reminderis also being

 Formal and informal issues raised through Complaints and PALS have been used to understand and assess the experience of patients attending the Gynaecology Emergency Department, patients are invited to board meeting to share their experiences

*Patient Stories continue to be shared with the Board and departmental staff and we are working closely with patients who are sharing their experiences, recordings of patients experiences are with consent being utilised to widen opportunities to learn from feedback

·Identified funding for additional nurses to be trained in scanning and working with colleagues in ultrasound to mentor nursing staff in early pregnancy scanning, Two additional members of our team have completed competencies -additional service extension is being considered. NICE guidelines for the management of miscarriage have been assessed to understand compliance levels - Action plan to address non compliance

•Established emergency follow up clinics for patient with pregnancy of unknown location, offering consistent approach with continuity and senior clinical presence

Introduction of quality indicators that incorporate specific feedback relating to service experience, thus developing an on-going feedback mechanism for patients, Displayed within department and disseminated to team members

Relocation to a newly developed Emergency department. Designs and furnishings have been installed taking feedback from pati ents into consideration.

Local quality meeting is ensuring robust cascading of information, promoting opportunities to learn lessons.

·Work force review staffing increase in place.

Staff development roles to improve the time management of the patients.

What were results of these assessments?

•Waiting times too long Communication

Staff attitude/ Customer care

•Waiting times for scans / inability to offer one stop scan

Has this resulted in improved patient experience?

*Local ownership, department managers have increased involvement in problem solving and have ability to influence service provision at the point of

•Flexible use of additional rooms/ resources

•Meaningful measurements in place, enabling benchmarking across Trust and Month on Month performance

systems and processes in place to address feedback

*Department relocation, investment in facilities, new reception area with privacy area, increased rooms, improved waiting are a and accessibility to

Liverpool Women's NHS Foundation Trust Accident & Emergency Department Clinical Quality Indicators Overview This dashboard presents a comprehensive and balanced view of the care delivered by our A&E department, and reflects the experience and safety of our patients and the effectiveness of the care they receive. These indicators will support patient expectations of high quality A&E services and allow our department to demonstrate our ambition to deliver consistently excellent services which are continuously improving. General Information LIVERPOOL WOMEN'S NHS FOUNDATION TRUST A&E site name and organization code A&E site type Type 2 (Specialist) Hayley McCabe, Ext 4213 Contact details for further information October 2015 - The time period the data in the dashboard relate to Summary of performance - October 2015 **Consultant Sign-off** Treatment Total time in A&E Initial Assessment 95% of patients not requiring admission to hospital waited under 210 minutes 95% of patients 95% of patients NOT APPLICABLE TO OUR from arrival to departure (threshold 240 waited under 12 On average, patients waited under 216 **TRUST** minutes) waited 76 minutes minutes from minutes from arrival to initial from arrival to Patient arrival to departure treatment (threshold assessment arrives at (threshold 240 95% of patients who needed admission (threshold 15 60 minutes) minutes) to hospital waited under 230 minutes minutes) **Ambulatory Care** from arrival to departure (threshold 240 minutes) Left without being seen Legend NOT APPLICABLE TO OUR Successfully meets performance threshold **TRUST** 2.81% of Re-attendance attendances this Does not meet threshold month left the department before 0% of attendances being seen this month were (threshold 5%) unplanned reattendances (threshold 5%) Service Experience A greater emphasis on sharing the experiences of our patients has ensured that both the departmental staff and excutive board are able to hear our patients experiences of using the gynaecology department emergency service. In sharing their experiences, patients have enabled the whole team to reflect and prioritise actions to improve the patient experience. Trust representatives are also working closely

with collegues in primary care, to combine efforts to provide a more seamless service.

High volumes of telephone calls have been identified as an issue and we are commencing a new call handling service to improve the experience of those whom contact us for telephone advice, this will also assist departmental staff, and their time will be dedicated to
