

# LIVERPOOL WOMEN'S HOSPITAL NHS FOUDATION TRUST 2016/17 **Accident & Emergency Department Clinical Quality Indicators**

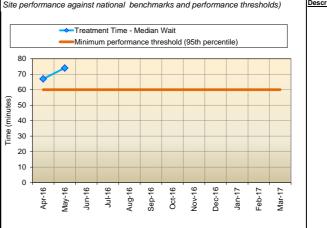

# Time to Treatment in A&E [HQU13]

Description of data Time from arrival to start of definitive treatmen from a decision-making clinician (someone who can define the management plan and discharge the patient).

#### Key messages

Time to the start of treatment should be minimised but not at the expense of other A&E Clinical Quality Indicators. Expert clinical opinion suggests that patients should be seen by a decision-maker within 60 minutes of arrival, but this may be too long for the more serious cases. The earlier the correct management plan is made the better for the natient: a wait of over 30 minutes is excessive for certain presentations, e.g., sepsis, stroke, myocardial infarction, respiratory distress. A median above 60 minutes from arrival to seeing a decision-making clinician across all patients may trigger intervention as this is one of the five A&E quality indicators included as a headline measure under national oversight to assess organisational and system health in the NHS Operating Framework for 2011/12. Narrative: The 60 minute target waiting to be seen by a decision making clinician has been the one performance target we regularly struggle to achieve. This is for a variety of factors, it could be just demand, patients acuity or the confidence and

experience poof the doctors on any given shift. Some may require more support than others and this can impact the flow of the whole review of the patients process. We are aiming to address this with the development of Emergency Nurse Practioner

Description of Performance

74 Median this month 60 Target

Data quality

Service experience

## What have we done to understand and assess the experience of our patients from April 2016

· Nursing quality indicators are now embedded and monthly patient questionnaires are undertaken. . Display boards are now in place in the department to share feedback.

roles that will allow them to see and treat patients in their own write, this then frees up the medical staff to see patients with a greater or more complex acuity level.

These results will be monitored and reported to the Trust Plans-

•Action Plans will be generated by the department Manager and the GED team to address any deficits.

been a slight increase in time to initial decision makers contact in May , no factors have changed.

Friends and Family questions are being asked and results are now available and published for GED

.We are actively promoting feedback

. Social media, twitter is also being used to encourage our patients to give feedback about the our Services. A text reminderis also being

· Formal and informal issues raised through Complaints and PALS have been used to understand and assess the experience of patients attending the Gynaecology Emergency Department, patients are invited to board meeting to share their experiences

\*Patient Stories continue to be shared with the Board and departmental staff and we are working closely with patients who are sharing their experiences, recordings of patients experiences are with consent being utilised to widen opportunities to learn from feedback

Identified funding for additional nurses to be trained in scanning and working with colleagues in ultrasound to mentor nursing staff in early pregnancy scanning, Two additional members of our team have completed competencies -additional service extension is being considered. •NICE guidelines for the management of miscarriage have been assessed to understand compliance levels - Action plan to address non compliance

•Established emergency follow up clinics for patient with pregnancy of unknown location, offering consistent approach with continuity and senior

•Introduction of quality indicators that incorporate specific feedback relating to service experience, thus developing an on-going feedback mechanism for patients, Displayed within department and disseminated to team members

•Relocation to a newly developed Emergency department .Designs and furnishings have been installed taking feedback from pati ents into consideration

·Local quality meeting is ensuring robust cascading of information, promoting opportunities to learn lessons.

Work force review staffing increase in place.

Staff development roles to improve the time management of the patients.

What were results of these assessments?

Waiting times too long

Communication

50

•Staff attitude/ Customer care

•Waiting times for scans / inability to offer one stop scan

## Has this resulted in improved patient experience?

\*Local ownership, department managers have increased involvement in problem solving and have ability to influence service prov ision at the point of

•Flexible use of additional rooms/ resources

•Meaningful measurements in place, enabling benchmarking across Trust and Month on Month performance

systems and processes in place to address feedback.

\*Department relocation, investment in facilities, new reception area with privacy area, increased rooms, improved waiting are a and accessibility to refreshments/ facilities

#### **Liverpool Women's NHS Foundation Trust Accident & Emergency Department Clinical Quality Indicators** Overview This dashboard presents a comprehensive and balanced view of the care delivered by our A&E department, and reflects the experience and safety of our patients and the effectiveness of the care they receive. These indicators will support patient expectations of high quality A&E services and allow our department to demonstrate our ambition to deliver consistently excellent services which are continuously improving. General Information LIVERPOOL WOMEN'S NHS FOUNDATION TRUST A&E site name and organization code A&E site type Type 2 (Specialist) Hayley McCabe, Ext 4213 Contact details for further information May 2016 - The time period the data in the dashboard relate to Summary of performance - May 2016 **Consultant Sign-off** Treatment Total time in A&E **Initial Assessment** 95% of patients not requiring admission to hospital waited under 232 minutes 95% of patients 95% of patients NOT APPLICABLE TO OUR from arrival to departure (threshold 240 waited under 14 On average, patients waited under 232 **TRUST** minutes) minutes from waited 74 minutes minutes from arrival to initial from arrival to Patient arrival to departure treatment (threshold assessment arrives at (threshold 240 95% of patients who needed admission (threshold 15 60 minutes) minutes) to hospital waited under 234 minutes minutes) **Ambulatory Care** from arrival to departure (threshold 240 minutes) Left without being seen Legend NOT APPLICABLE TO OUR Successfully meets performance threshold **TRUST** 3.56111645813282 Re-attendance % of attendances Does not meet threshold this month left the department before 0% of attendances being seen this month were (threshold 5%) unplanned reattendances (threshold 5%) Service Experience A greater emphasis on sharing the experiences of our patients has ensured that both the departmental staff and excutive board are able to hear our patients experiences of using the gynaecology department emergency service. In sharing their experiences, patients have enabled the whole team to reflect and prioritise actions to improve the patient experience. Trust representatives are also working closely with collegues in primary care, to combine efforts to provide a more seamless service. High volumes of telephone calls have been identified as an issue and we commenced a new call handling service to improve the experience of those whom contact us for telephone advice. This activity is now evidenced and deliverd by registered nurses
