

**Staffing Report - MLU & Jeffcoate** **December-2017** Last updated: 09/01/2018 at 18:42

<b>Funded WTE</b>	<b>Registered</b>	35.96	<b>Current WTE</b>	<b>Registered</b>	34.6	<b>Number of shifts lost to Sickness Absence</b>	<b>Registered</b>	16
	<b>Unregistered</b>	9.84		<b>Unregistered</b>	8.1		<b>Unregistered</b>	8
	<b>Total</b>	45.80		<b>Total</b>	42.70		<b>Total</b>	24

**Narrative**

The Midwifery Led Unit (MLU) is a low risk birthing environment for women with no medical complications. The team is made up of a supernumerary shift leader and 5 other midwives per shift, there is also one support worker per shift. On days where staffing levels do not appear to meet agreed levels this is due to lower bed occupancy on the MLU and staff being redeployed to areas within maternity which are busier at that time.

**Narrative**

On a night shift, the agreed staffing levels for MLU is a supernumerary shift leader, 5 other midwives and one support staff. During the night shift when the MLU is quiet staff are redeployed to support other areas within maternity which are busier at that time.

**Staffing Concerns**

No concerns raised.

<b>Number of shifts where staffing levels are not compliant with planned levels</b>	<b>47</b>
<b>Number of staffing related concerns escalated to Matron or higher</b>	<b>0</b>

**Ward Manager's Assurance Statement**

There appears to be 24 day and 23 night shifts where staffing does not appear to meet agreed levels, however this is due to a robust system where staff are flexed across maternity services to support areas of high acuity. A reduction in staff on the MLU therefore reflects lower occupancy levels and staff moving to other areas to provide a safe maternity service. Staff maintain one to one care in established labour and escalate any issues to the maternity sleep holder.
