

Staffing Report - MLU & Jeffcoate **May-2018** Last updated: 26/06/2018 at 09:57

Funded WTE	Registered	36.34	Current WTE	Registered	32.58	Number of shifts lost to Sickness Absence	Registered	21
	Unregistered	7.95		Unregistered	6.29		Unregistered	4
	Total	44.29		Total	38.87		Total	25

Narrative

The Midwifery Led Unit (MLU) is a low risk birthing environment for women with no medical complications. The team is made up of a supernumery shift leader and 5 other midwives per shift, there is also one support worker per shift. On days where staffing levels do not appear to meet agreed levels this is due to lower bed occupancy on the MLU and staff being redeployed to areas within maternity which are busier at that time.

Narrative

On a night shift, the agreed staffing levels for MLU is a supernumery shift leader, 5 other midwives and one support staff. As on the day shifts, on nights where staffing levels do not appear to meet agreed levels this is due to lower bed occupancy on the MLU and staff being redeployed to areas within maternity which are busier at that time.

Staffing Concerns No concerns raised.

Number of shifts where staffing levels are not compliant with planned levels	55
Number of staffing related concerns escalated to Matron or higher	0

Ward Manager's Assurance Statement

From the graphs, it appears that a large portion of both day and night shifts staffing do not appear to meet agreed levels, however this is due to a robust system where staff are flexed across maternity services to support areas of high acuity. A reduction in staff on the MLU therefore reflects lower occupancy levels and staff moving to other areas to provide a safe maternity service. Staff maintain one to one care in established labour and escalate any issues to the maternity bleep holder.
