

Staffing Report - MLU

June-2019

Last updated: #VALUE! at #####

Funded WTE	Registered	21.2	Current WTE	Registered	27.58	Number of shifts lost to Sickness Absence	Registered	21
	Unregistered	5.3		Unregistered	0.81		Unregistered	9
	Total	26.50		Total	28.39		Total	30

Day Shift

Narrative

The Midwifery Led Unit (MLU) is a low risk birthing environment for women with no medical complications. The team is made up of a shift leader and 3 other midwives per shift. There is also one support worker per shift. On days where staffing levels do not appear to meet the agreed staffing levels this is due to lower bed occupancy on the MLU and staff being redeployed to support other areas within maternity in times of higher acuity.

Night Shift

Narrative

On a night shift, the team is also made up of shift leader and 5 other midwives. There a support worker. On night shifts where the bed occupancy is lower on the MLU, staff are redeployed to support other areas within maternity in times of higher acuity.

Staffing Concerns

Number of shifts where staffing levels are not compliant with planned levels

Number of staffing related concerns escalated to Matron or higher

Ward Manager's Assurance Statement

From the graphs, there appears to be 6 day shifts and 9 night shifts where staffing does not appear to meet the agreed staffing levels, however this is due to a robust system where staff are flexed across maternity services to support areas of high acuity. A reduction in staff on the MLU therefore reflects lower occupancy on the MLU and staff moving to other areas to provide a safe maternity service. Likewise the graph also demonstrates that in times of high acuity within the MLU, staff has been redeployed to MLU to assist, and staffing levels were higher than agreed levels at that time. Staff maintain one to one care in established labour and escalate any issues to the maternity bleep holder.
